

1. Five Common Cyber Threats

1. **Phishing Scams**
Fraudulent emails or messages designed to steal personal information.
2. **Weak Passwords**
Easily guessed passwords that compromise account security.
3. **Public Wi-Fi Attacks**
Hackers intercepting data on unsecured networks.
4. **Social Engineering**
Manipulating individuals into revealing confidential data.
5. **Malware/Ransomware**
Malicious software that damages or holds data hostage.
